PROFESSIONAL SUMMARY

Detail-oriented IT Support professional and fresh graduate in Information Technology (D4) from Politeknik Negeri Padang. Over 5 years of hands-on experience in hardware troubleshooting, PC assembly, OS installation, and end-user technical support. Adept at diagnosing and resolving software and hardware issues efficiently. Experienced in supporting clients across freelance, academic, and project-based settings. Strong communicator with a proven track record of delivering reliable technical assistance to individuals and small businesses.

WORK EXPERIENCE

IT Support Technician — Freelance

April 2020 – Present

- Diagnosed and resolved hardware/software issues for clients including laptops, PCs, and smartphones.
- Performed OS installations (Windows, Linux) and full system setups for home and small business users.
- Assembled and configured custom desktop PCs tailored to client specifications and budgets.
- Provided remote and on-site technical consultation and support.
- Maintained device performance through scheduled maintenance, driver updates, and preventive diagnostics.

Project Manager — Songket.id

Jan 2026 – Apr 2026

- Led a team of 4 developers to deliver a digital platform for Sawahlunto's songket cultural heritage within a 4-month timeline.
- Managed sprint planning, feature prioritization, and stakeholder communication throughout the project lifecycle.
- Coordinated with frontend and backend developers to ensure on-time delivery of all major milestones.

Project Manager — Hashira TechSolution

Aug 2025 – Dec 2025

- Managed the T-Quiz software project using Agile/Scrum methodology, delivering all features within the agreed 5-month timeline.
- Coordinated a cross-functional team of 3 engineers, distributing tasks and monitoring weekly progress.

Backend Developer Intern — Appskep

Aug 2024 – Dec 2024

- Designed and implemented a normalized MySQL database schema for a healthcare competency exam platform.
- Built and documented RESTful API endpoints integrated with the frontend mobile application.
- Optimized SQL queries to improve database response time and overall system performance.
- Conducted API testing and debugging using Postman to improve system stability.

EDUCATION

Bachelor of Applied Science (D4) – Information Technology — Politeknik Negeri Padang

2021 – 2025

GPA: 3.36 / 4.00 • Final Project: Android-based Minangkabau Batik Pattern Recognition using CNN & TensorFlow
